BEARCOM®

EMERGENCY RESPONSE VOICE, VIDEO, & DATA SOLUTIONS

Speed Response, Improve Safety and Enhance Service to the Community.

Two-Way Radios. Coordinate response teams and enable Social Distancing.

Rental Solutions. Temporary communications infrastructure adds connectivity, supplements fleet devices, and creates stand-alone talk groups in temporary facilities.

Extend Wireless Coverage. BearCom deploys signal boosters to increase in-building coverage for two-way radios and cellular networks (including FirstNet).

Interoperability Gateways. BearCom offers Cubic Vocality Radio-over-IP modem gateways and other connectivity solutions to integrate radio networks, connect radios with cellular devices, and communicate with dispatch centers.

WiFi Connectivity. Create Voice/Video/Data internet-access Hotspots for information-sharing – including video streaming.

Mobile Command Centers. BearCom can bring in and set up a variety of temporary voice, video and data mini-command centers.

Mobile Computers. Outfit remote response teams with rugged tablet computers.

End-To-End Services. BearCom deploys, installs, trains, and staffs as needed.

BearCom is AlwaysOn!

During the COVID-19 Pandemic, as an Essential Services Provider, BearCom is reaching out to health institutions and emergency response teams as they work diligently to provide care and service. We're expediting orders and dispatching communication tools as well as on-site services as quickly as possible. Recent examples include:

- On a recent Saturday, our field technicians worked with a key partner to install a cellular wireless signal booster for the Dallas County Emergency Operations Center (EOC).
- Our Rentals Team rushed radios to a food pantry same-day in Colorado to meet increased distribution demands.
- In Northern California, Rentals delivered 6-10 radios each to COVID-19 testing facilities.
- At an Atlanta-based nursing home, BearCom expedited installation of a BDA-DAS signal booster to ensure Public Safety officials remain connected in critical situations.
- BearCom provisioned and delivered 15-20 radios to an Emergency Room in California to help their staff deliver urgent care.
- For a healthcare group in San Diego, BearCom completed two-way sales and rentals deployments for the security department, as well as allowing staff who were isolating to communicate with other groups.

Technical Design, Installation & Service Credentials for Emergency Response

- Many of our techs are P25-certified for public safety communications, and we have dispatch center expertise.
- Frontline experience activating FirstNet® service, as an authorized FirstNet® Dealer.
- BearCom is Motorola's largest converged systems integrator, plus we've earned Service Elite Specialist status.
- More than 50,000 devices in our rentals fleet.
