BEARCOM MOBILE COMMAND CENTER SOLUTIONS

ON-SITE COMMUNICATION INFRASTRUCTURE AVAILABLE IN SEVERAL CONFIGURATIONS WITH OPTIONS FOR SHORT OR LONG TERM RENTALS

MOBILE COMMAND CENTERS

BearCom offers a variety of Mobile Command Center (MCC) solutions to provide temporary infrastructure for mission-critical voice, video and data connectivity.

Better Communications

Our MCC solutions integrate two-way radios, cellular devices and video surveillance. BearCom is also highly-experienced with P25 and FirstNet public safety protocols.

Information-Sharing Technologies

Configuration options include Wi-Fi hot spots that enable video conferencing, access to internet-data, and instantly send assets to multiple sites such as: maps, schematics, plans, instructions and video feeds.
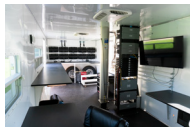

Full Deployment Services

BearCom will design, deliver and stand up your MCC to ensure full interoperability and coverage. Available for short and long-term rentals, a BearCom MCC comes complete with repeater racks, radio storage, signal boosters, and more. Trunking solutions can establish networks and extend communication range to multiple sites, as needed.

COMMUNICATION TRAILERS

BearCom offers many sizes, configurations, and work space options. These communication trailers provide a great place to check in/out radios and clean/store in a safe and dry environment.

BEARCOM EVENT VEHICLE (BEV)

The BEV is a 26-foot box truck that supports mega-events as a fully-integrated two-way radio equipment network platform that is customized to fit customer needs. The vehicle includes an 80-foot pneumatic telescoping antenna mast for superior site coverage and supports up to 24 repeaters.
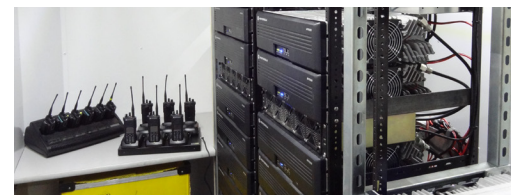

BEARCOM CUBS

Our mobile equipment cabinets are a simple, affordable way to enhance communications across your site, facility, or complex.

ⓘ ABOUT BEARCOM

BearCom is the largest value-added reseller in the world of Motorola Solutions two-way radio systems with 80 locations throughout North America. BearCom also offers technical expertise in Point-To-Point and Point-To-Multipoint networks, CCTV/process cameras, as well as complete system design and installation of Bi-Directional Amplifiers (BDA) and Distributed Antenna Systems (DAS). When working with BearCom, you're partnering with a wireless solutions provider who knows your vertical market, and provides the wireless voice and data solutions you need to be successful.

BearCom also has a Network Operations Center (NOC) to monitor network connections and a National Service Depot to repair radios and equipment.
