

## BEARCOM EXCLUSIVE TWO-WAY RADIO SOLUTIONS

Battery, Charging Cradle, Power Supply, Antenna, and Belt Clip Provided With Every Radio!

### BC300D

- Built with DMR (Digital) Technology for Added Clarity and Coverage
- Operates in Dual Analog and Digital Mode - Talks with All Radios

Manufactured exclusively for BearCom by Motorola Solutions, this feature-rich and affordable communication device is engineered with the latest digital (DMR) technology. The BC300D operates in digital mode for added clarity and functionality, or it can be programmed to use with analog radios as part of a digital migration strategy. Comes standard with a 2-Year Warranty with Extended Warranty options available.

### BC130

- Simple and Easy to Operate Push-to-Talk Device
- Built for the Job: IP54 Rated for Dust, Dirt and Water Protection

The BC130 is compact and lightweight with simple push-to-talk features. Built with a rugged, die-cast chassis that is ideal for both commercial and industrial environments, this radio is ideal for schools, hospitality, retail, manufacturing and more. Comes standard with a 2-Year Warranty with Extended Warranty options available.

### BC200

- Sleek and Lightweight Design
- Quiet Talk (QT) tone key to eliminate unwanted signals

Slim, thin and light. The BearCom BC200 portable radio is easy to handle and easy to operate. This highly compact radio is extremely reliable, meeting the famously tough Military Standard 810 C/D/E/F/G specifications and IP54 rating for dust/ water intrusion.

### BC1000

- Includes Man Down and Lone Worker Functions
- 16 Channels and 2 Programmable Buttons

This user-friendly two-way radio features dust-tight construction that prevents damage and malfunction from moisture and particles. The BC1000 also has three emergency related functions: motion detection, man down, and lone worker functions.

### BC-Mini

- Fits Easily in a Pocket
- 15 Hour Battery Life

The BearCom BC-Mini is a UHF two-way radio that provides 1.5 watts of transmit power, 4 channels, and up to 15 hours of operation on a single charge. At only 3.9 ounces, this small yet powerful radio is lightweight and simple to operate.

Radio Accessories can add audio clarity, wearability, and overall functionality to your two-way radios.
