MAINTAIN SOCIAL DISTANCING & OPTIMIZE PRODUCTIVITY

If you're responsible for distribution center operations and product deliveries, BearCom has multiple voice, video, and data solutions to meet health and safety best practices, productivity goals, and service objectives. BearCom offers many other two-way radio solutions designed to improve communications and collaboration to drive operating efficiencies and enhance team performance.

Our two-way radio solutions and accessories keep warehouse workers engaged, mobile teams informed, and assembly line personnel connected from safe distances even when ambient noise can be a distraction – all of which increases efficiency and enhances worker safety.

TLK 100: The Perfect Hands-Free Device with Nationwide Coverage for Drivers and Distribution Centers

By combining the broad coverage of a national cellular network with the ease of two-way radio communications, the TLK 100 two-way radio gets your mobile team connected fast. Ideal for companies that require team members to talk beyond the normal radius of a two-way radio. With the TLK 100, drivers can utilize a rugged two-way radio that offers push-to-talk at the push of a button – create a local, regional, or national network.

ENHANCE RADIO COVERAGE IN YOUR FACILITY WITH A BDA-DAS

BearCom stands ready to help your company navigate, integrate, and implement the best voice, video, and data connectivity strategies in your warehouse.

BearCom provides custom-designed, bi-directional amplifier and distributed antenna systems to extend radio and cellular coverage range for each unique environment. Whether you need to improve your own team's radio communications or comply with Public Safety two-way radio coverage requirements, BearCom can help. Our team has deep levels of expertise deploying DAS and BDA solutions that meet International Fire Code (IFC), National Fire Protection Association (NFPA) statutes, and FCC requirements.
