

TOP 5 REASONS BEARCOM IS THE BEST CHOICE FOR YOUR NEXT TURNAROUND OR MAINTENANCE SHUTDOWN PROJECT

1 RELIABLE PRODUCTS IMPROVE EFFICIENCY AND SAFETY

Losing an hour of productivity can cost \$260,000 or more.* If you rent radios from an inexperienced supplier, you risk poor performance and device breakdowns that jeopardize productivity and safety. BearCom's Motorola Solutions two-way radios are top-of-the-line in delivering reliable, clear communications.

2 BEARCOM ESTABLISHES A FREQUENCY AND CHANNEL PLAN

The chance for injuries and even fatalities increases significantly when crane operators, operation teams, and supervisors compete for radio frequencies. Channel interference can garble communications, putting everyone at risk. As Motorola Solutions' largest dealer and integrator of two-way radios, BearCom can create an effective channel plan allocating properly licensed frequencies to ensure reliable contractor communications. We can also coordinate channels when contractors operate within the site's existing two-way radio system.

3 EMERGENCY FEATURES IMPROVE SAFETY

Instant communication can make the difference in preventing a safety incident. BearCom can partner with work teams and contractors to enable emergency notifications on all devices. We also offer Intrinsically Safe (Hazardous Location) radios. Many of our rental models include advanced safety feature options, including Man Down/Lone Worker alerts and GPS tracking.

4 SUPERIOR COVERAGE ENSURES BETTER COMMUNICATIONS

The better your coverage area, the more effective your communications. Whether your needs are within a single unit only or you require site-wide coverage, BearCom will deliver the right engineered solution for you.

5 BEARCOM EXPERTS OFFER FAST, RELIABLE SUPPORT

BearCom knows that good communication is a necessity during turnaround projects. We serve hundreds of petrochemical plants and refineries from coast-to-coast locations across North America. We also serve power plants, manufacturers, and other industrial facilities where maintenance shut-downs require communications equipment. Our experienced rentals team, including solution architects and service technicians, offer full support before, during, and after your project to ensure safe and reliable communications. We offer same day equipment exchanges and 24/7 support because every minute counts during a turnaround project.
