WAVE BROADBAND PTT MOBILE APPLICATION

SINGLE APP. MULTIPLE FUNCTIONS.

Turn your phone into a Push-To-Talk (PTT) handset with the WAVE PTT Mobile Application and get instant communication anywhere you have broadband service. Connect your two-way radio system into WAVE and extend talkgroups so that everyone can be part of the conversation, regardless of the device they carry or network they are using.
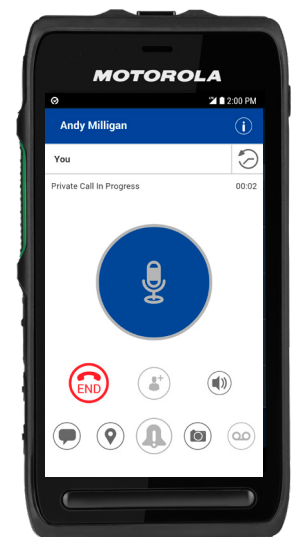

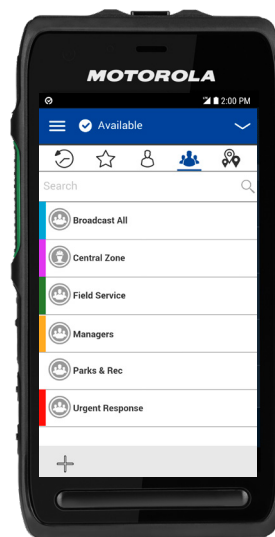

NOTHING IS FASTER THAN PTT
Get the speed and simplicity advantages of two-way radio communication on your smartphone. Communicate and collaborate with individuals or teams at the touch of a button.

LET EVERYONE BE PART OF THE CONVERSATION
Smartphone and two-way radio users can join the same talkgroups so the back office and front office are always connected. Keep critical team members connected even when out of radio coverage or off duty.

INCREASE THE CLARITY
AND SPEED OF COMMUNICATION
Not everything can be expressed efficiently with voice. Push text, video, images and file attachments and ensure everyone clearly gets the message.

KEY FEATURES

PTT Communications – Fast, secure and reliable PTT voice communication at the touch of a button. Collaborate with an individual, predefined group or ad-hoc groups created on the fly.

Integrated Messaging – Push text, video, audio, photos and files to individuals or groups. See threaded history for communication details. Store and forward is supported for offline users.

Mapping and Location – Find an address, coordinate a meeting place or share your location with others.

Photo and Video Sharing – Take a photo or record a video and share with your team for instant clarity of information.

Voice Messaging – Leave a message when a contact or group members are unavailable. WAVE will automatically deliver the message when users become available.

Real-Time Presence – Set your status and see who is available with real-time presence information – Available, Do Not Disturb or Offline.
OPERATING MODES

Two modes of operation are available from the same application – the simplicity of two-way radio operation or full multimedia communication. Administrators set the user interface from a centralized administration tool.

Radio PTT Mode

Emulate a two-way radio experience with a streamlined user interface.

- Single, easy-to-use screen with predefined talkgroup buttons
- Group and private calling
- Location reporting
- Background calling
- Priority / talkgroup scanning

Standard Mode

Full-featured user interface with PTT, multimedia messaging and location.

- Instant private or group calling with the touch of a button
- Integrated secure messaging
- Real-time presence
- Call alerts with selectable tones
- Voice messaging
- Mapping and location services
