

FOR PETROCHEMICAL, OIL & GAS

ACHIEVE GREATER SAFETY, INTELLIGENT PRODUCTION AND ASSET SECURITY.

DISCOVER UNIFIED TEAM COMMUNICATION WITHOUT BOUNDARIES

Your industry faces challenges today that would have been unimaginable just a few years ago. Increased competition, economic uncertainty, more regulations, new technology and managing staff connectivity using different devices all add to the challenges of maintaining a safe, profitable operation.

At BearCom, we understand your upstream and downstream operational challenges. From connecting prospecting teams in the field, to operators monitoring pipelines, to coordinating movement of end-products, to managing turnarounds more efficiently, instant communication is integral to achieving safe and efficient organizational outcomes.

Take the first step toward safer, more successful, and more efficient Team Communications. BearCom has been a proven leader in the Wireless Industry for over 35 years, and we serve clients from more than 35 locations across the country. Our seasoned Technical Services Group is comprised of more than 100 factory trained staff, who have earned Motorola Solutions Service Elite specialist status, as well as advanced certifications throughout our industry. Leverage our expertise to help make your organization as safe, efficient, and profitable as possible.

WHY CHOOSE BEARCOM? THE ANSWER IS SIMPLE...

We have the products, solutions, knowledge, and experience you need for peak performance.

- We offer the latest digital MOTOTRBO™ radio networks and applications.
- We sell, rent, and service a wide selection of wireless solutions.
- We design and deploy wireless networks with digital voice, data, and notification capabilities that enhance emergency communications.

QUICK FACT

BearCom is the largest two-way radio provider and integrator in the world for Motorola Solutions, and we have more than 30,000 customers worldwide in nearly every sector.

ANY DEVICE | ANY NETWORK | ANY APPLICATION
IMPROVE SAFETY AND EFFICIENCY
WITH CONNECTED TEAMS

ASSURE THE SAFETY AND SECURITY OF YOUR PERSONNEL

A healthier bottom line is not the only benefit of our Team Communication solutions. We can also increase safety by ensuring that critical emergency information is shared with everyone at the push of a button. In addition, we can engineer digital MOTOTRBO™ systems that integrate seamlessly with site monitoring systems to send immediate notifications to radio users. In addition, two-way radios designed for hazardous environments, along with GPS tracking, Lone Worker and Man Down alerts, and other personal security features boost protection for workers inside and outside the plant. The result is that the safety of your team – and your organization overall – is greatly enhanced.

INSTANT COMMUNICATION YIELDS INSTANT IMPROVEMENTS

When answers are needed, production is delayed, or safety situations arise, nothing is faster than push-to-talk. Our Team Communication solutions provide the instant collaboration needed for high performing teams. Communicate one-to-one or one-to-many across groups (including contractors) in challenging noise environments. For even greater connectivity, ask us about Motorola's WAVE™ broadband push-to-talk (PTT) application. WAVE offers networking solutions to connect two-way radios with smartphones, tablets, and laptops to expand the same conversation wherever network connectivity exists.

BOLSTER COMMUNICATION CAPABILITIES WITH RENTAL EQUIPMENT

When you need to deploy extra radios and communications networks for your next turn-around or capital improvement project, BearCom offers more than 25,000 two-way radios and other wireless rental units – the largest fleet in the world.
